

## **OPERATING BUDGET PROCESS**

The general framework for the Operating Budget process is presented in Exhibit 3. Formalization of the process began in FY1988 with the establishment of basic policies. In FY1989, City Council approved an ordinance requiring a monthly financial status report from the Finance and Administration Department and the Office of the City Controller.

The budgetary process was further strengthened with the adoption of the integrated budgeting and planning resolution and budget calendar ordinance in FY1989. This resolution includes linking plans and budgets for the General, Enterprise, and Special Revenue Funds and the Capital Improvement Plan (CIP). The integrated approach also calls for service impact information, input from the public and elected officials, and linking current budgets with five-year forecasts. The budget calendar ordinance requires the development of a budget calendar with specific dates for the presentation of several phases of the budget as illustrated in Exhibit 4.

The amendment process for the budget is governed by Section 102.009 (b) (c) of the Texas Local Government Code which stipulates that after final approval of the budget, the City Council must spend funds only in strict compliance with the budget, except in an emergency. The City Council may authorize an emergency expenditure as an amendment to the original budget only in a case of grave public necessity to meet an unusual and unforeseen condition that could not have been included in the original budget through the use of reasonably diligent thought and attention. If Council amends the original budget to meet an emergency, Council shall file a copy of the resolution amending the budget with the City Secretary, and the City Secretary shall attach the copy to the original budget.

In March 2002, Finance and Administration began briefing Council on the preparation of the FY2003 Budget. After departments submitted their budgets, a series of meetings with the Finance and Administration Department were conducted to evaluate and determine the requests that would be incorporated into the Mayor's Budget. During April, preliminary revenue estimates were presented to the Fiscal Affairs and Management Initiatives Committee, and budget presentations were conducted in May and June.

The base budget for FY2003 was derived from adjustments to the FY2002 budget. These adjustments included additional funds for health benefits, transfer of functions from one department to another, electricity and other reductions, deletion of one-time expenditures, and additions for operational support of capital improvement projects.

## **CAPITAL IMPROVEMENT PLAN PROCESS**

The process to prepare and adopt the five year Capital Improvement Plan (CIP) for FY2003-FY2007 generally follows the same procedures as the Operating Budget. Refer to Exhibit 5 for this schedule and comparison.

In February and early March, public meetings were conducted in all Council districts. During these meetings, citizen comments were received regarding capital project plans. Comments were forwarded to applicable Council Members, Public Works and Engineering (PW&E), and other City departments. City departments reviewed projects in the FY2002-FY2006 CIP to determine whether rescheduling of projects and adjustments in funding would be required.

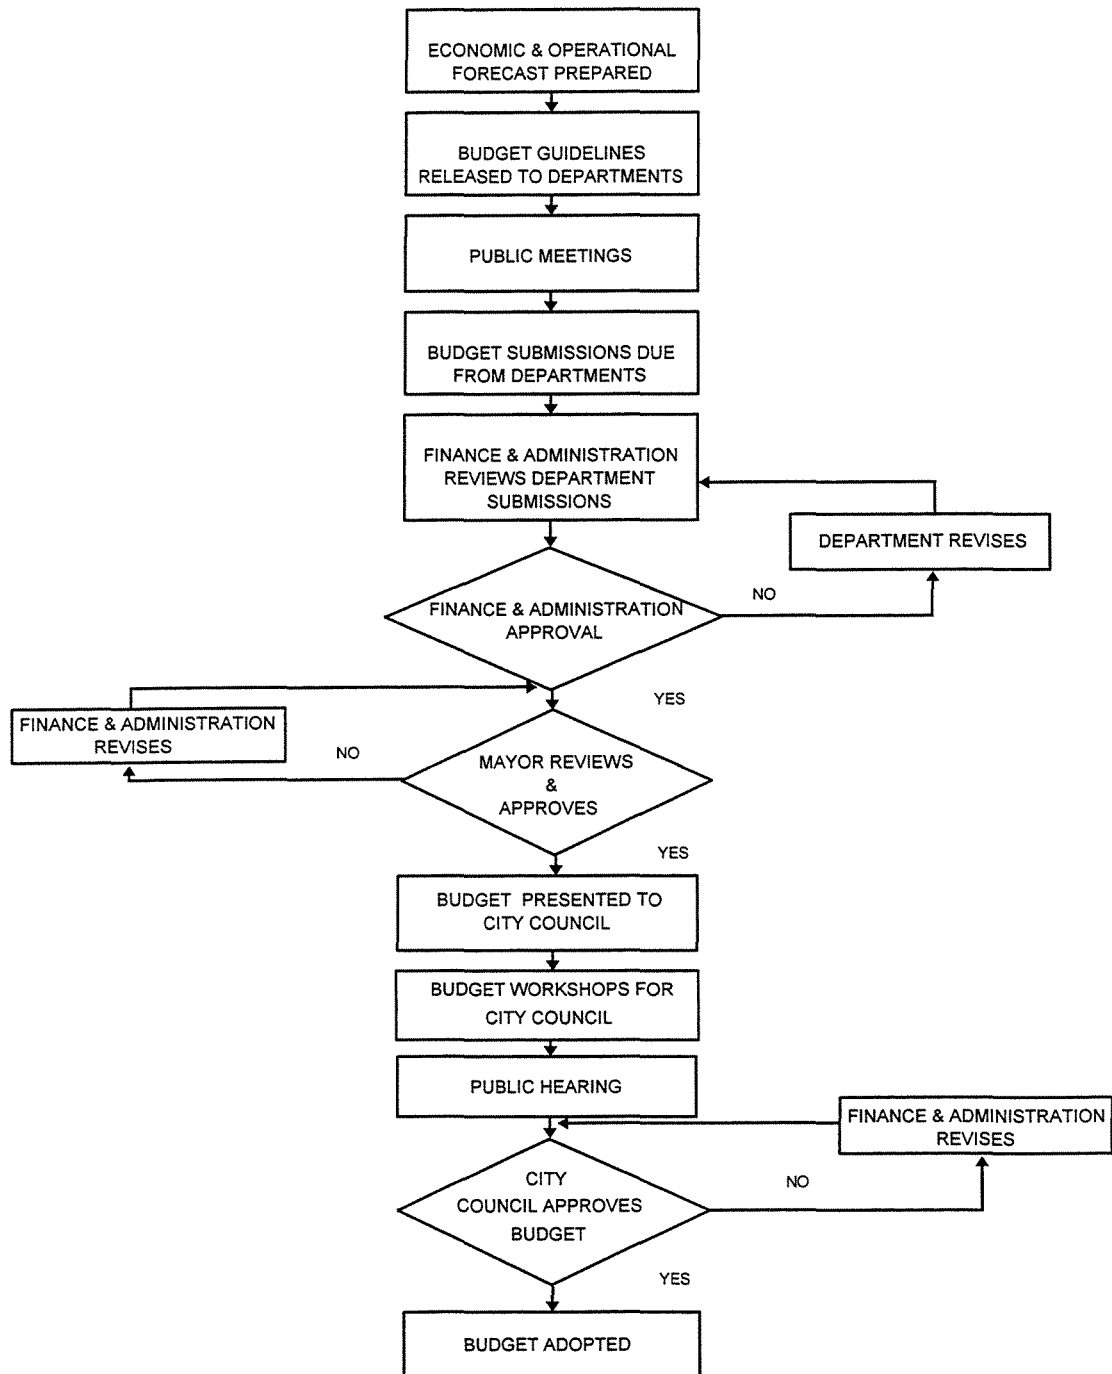

In March and April, departmental CIP submissions were received, reviewed, and evaluated by the CIP Coordinating Committee and the Finance and Administration Department (F&A). CIP reviews and discussions between departments, the CIP Coordinating Committee and F&A were held in April and May. Upon completion of the CIP Coordinating Committee review sessions, a proposed FY2003-FY2007 CIP was prepared for presentation to City Council for review and adoption.

Enterprise fund capital projects may vary from FY2002, but would do so only as a result of considerations internal to each respective enterprise/revenue bond fund program. Enterprise projects and Public Improvement Bond (PIB) funded projects to be implemented over the next five years are included in the FY2003-FY2007 Capital Improvement Plan. A Capital Improvement Plan Summary is included in the Appendices. The Summary identifies projects planned for FY2003 along with their expected operating costs.

The FY2003-FY2007 Capital Improvement Plan is presented in three separate documents: an Executive Summary, Volume One which delineates the PIB capital programs, and Volume Two which incorporates the Enterprise Capital Programs.
